Next Generation Reporting and API Access for ResearchMonitor

OPTIMIZE INSIGHTS

Optimize Insights is the next generation in subscription management reporting. It sits at the heart of TRG Screen's new Optimize platform and is now available for ResearchMonitor – our usage tracking solution for online resources and applications.

Proactively manage and optimize legal research and information subscriptions with comprehensive analytics, actionable insights and vital management reporting on usage data from across the organization.

Insights Library	**Dashboard Studio**	**Pivot Studio**	**Extend Datasets**
Curated library of visual analytics and actionable insights	Personalize BI-powered dashboards and visualizations	Manipulate raw data with drag and drop visualizations	Extract and integrate reporting datasets via web APIs

Optimize Insights turns usage data into actionable insights

Information, library, research and knowledge management departments benefit from visual analytics and insights that answer critical research usage and information management questions.

Usage Analytics	**Usage Drivers**	**Subscription Value**	**Maximize Value**
Who is using which products and resources, and what are the trends?	How and why is my subscription usage changing over time?	How much value do our subscriptions provide the company?	What are the best opportunities to reduce costs or increase value?
Resource Utilization	**Resource Allocation**	**Role Profiling**	**License Compliance**
What subscriptions are most or least utilized and who are the users?	Are we delivering the appropriate resources to users?	Are subscriptions consistent for each role type across the company?	Are users sharing their credentials or accessing unlicensed resources?

Are you ready to change the way you manage your legal research and information subscriptions?

Legal research and information subscription management can be hard to get to grips with. Optimize Insights allow you to maximize utilization, right-size subscriptions and improve research efficiency.
