More information: screenconsultants.com/fisd-certification

Professional certification from FISD will establish your credentials in the increasingly complex and competitive financial information industry. The Financial Information Associate (FIA) certification is the first formal accreditation for market and reference data practitioners and will only be awarded to those who pass the exam.

TRG Screen Consultants has cooperated closely with the FISD in conceiving, developing and providing certification training courses. For candidates who are interested in becoming a certified market & reference data specialist, TRG Screen Consultants offers these courses which are designed to fully prepare for the (optional) official FISD Professional Certification exam. If required we can tailor the training to your needs.
