

Analytics Suite

The ultimate self-service market data reporting and analysis tool

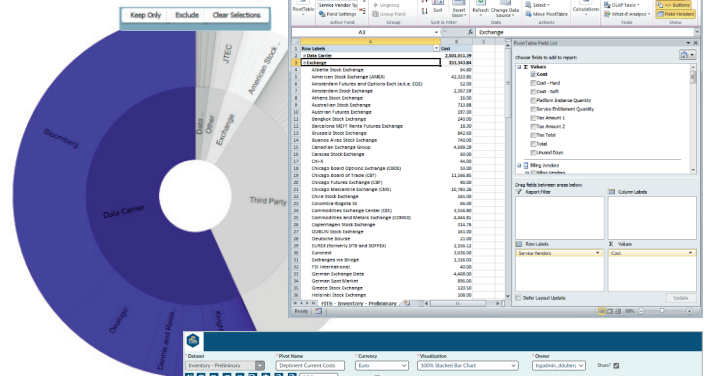

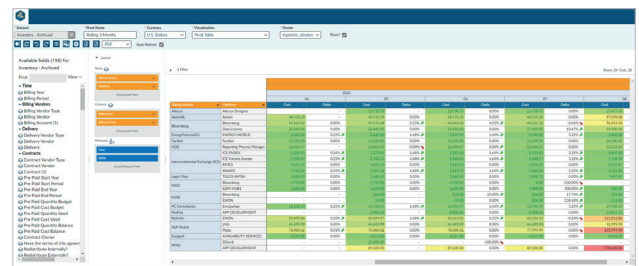

Optimize Spend Analytics Suite offers the most comprehensive analytics and reporting solution to market data and information services managers. As a core component of Optimize Spend, Analytics Suite empowers users to perform interactive reporting and advanced analytics on inventory and expense data within the platform.

Driven by high-performance, in-memory OLAP technology, the Analytics Suite provides completely flexible access to your data through a responsive drag-and-drop visual user interface and with comprehensive data exploration tools.

Key features

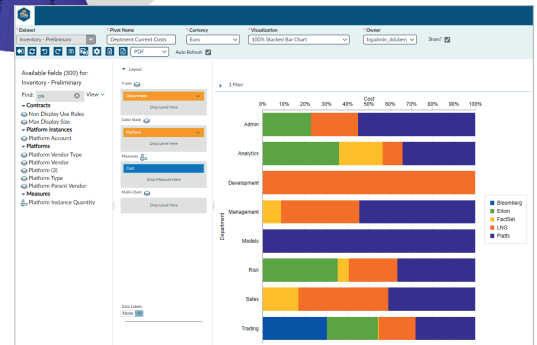

PIVOT STUDIO

- Create custom pivot tables and graphical data visualizations
- Manage multi-period reporting across inventory, invoices, allocations, contracts and more
- Drag-and-drop to slice-and-dice your data, interactively filter and drill down
- Dynamically explore data without the need to understand the underlying database structure
- Quick and easy filtering, conditional formatting and calculation field creation
- Drag-and-drop with no SQL to write, no table joins, no VLOOKUPS, no custom development

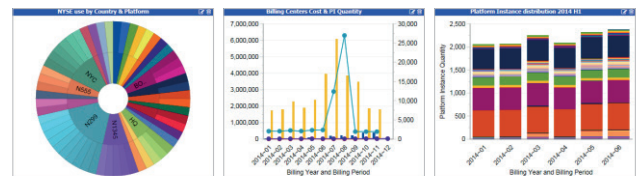

DASHBOARD STUDIO

- Drag-and-drop with an intuitive dashboard designer
- Assemble tables and visualizations into a bespoke dashboard layout
- Drill down from one element to update the entire dashboard
- Share interactive dashboards with your stakeholders

PIVOT STUDIO EXCEL CONNECT

- Live link Excel to data in Optimize Spend Pivot Studio
- Use Excel Pivot Tables to display your data, delegating the processing load to the server
- Excel sheets automatically update as Optimize Spend does

Analytics Suite is integral to Optimize Spend, with nothing additional to license.
