

VSource

VSource is a live digital catalog of more than 3,700 active market data vendors in the financial services industry. The database is powered by a proprietary alphanumeric taxonomy that captures product and service information at a granular level, enabling in depth search results segmented by vendor, product, service, geography, delivery, asset class, instrument type and more.

- A centralized hub that connects market data consumers to the vendor universe
- Research your vendors for a complete view of their capabilities
- Request vendor company/product updates
- Discover new vendors across numerous market sectors
- Identify competing products ahead of renewals

- Provide foundational content for know-your-supplier requirements
- Emerging technologies
- Coming Soon:
 - Vendor news
 - Product updates
 - End-of-life notifications

- Rich sector directories, including ESG, Indices, and Energy
- API integration of vendor/product descriptions into clients' internal platforms
- Client-driven prioritization of new vendors for upload and cataloging
- Vendors contribute company and product data through vendor portal
- More than 80 foundational company data fields
- Digital, flexible, dynamic and searchable database
