

The Dynamic Digital Catalog of Market Data Vendors, Products and Services

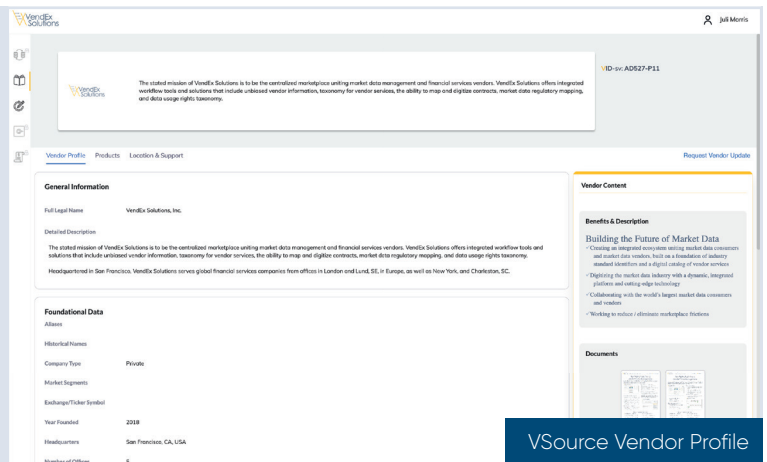

TRG Screen has partnered with VendEx Solutions to offer the VSource Digital Vendor Services Directory, which enables customers to easily research and compare market data vendors, products and services. VSource enhances TRG Screen's market data subscription optimization solutions, enabling financial services clients to more easily manage the entire lifecycle of their market data subscriptions.

VSource is a live digital catalog of more than 3,700 active market data vendors in the financial services industry. The database is powered by a proprietary alphanumeric taxonomy that captures product and service information at a granular level, enabling in depth search results segmented by vendor, product, service, geography, delivery, asset class, instrument type and more.

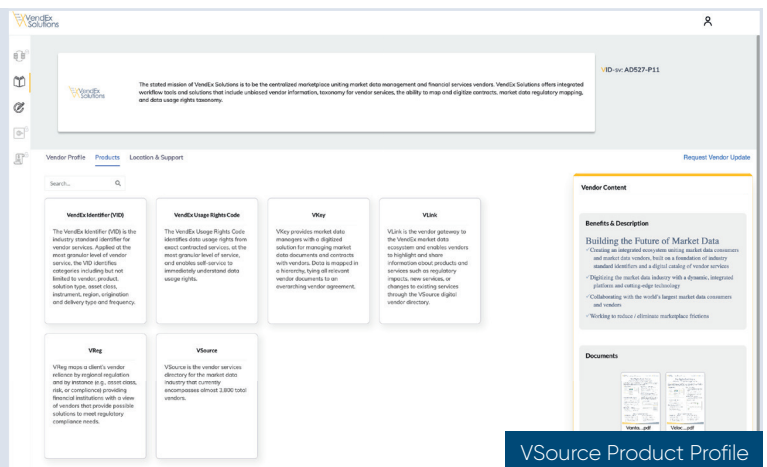

Research, Source & Compare Vendors

- A centralized hub that connects market data consumers to the vendor universe
- Research your vendors for a complete view of their capabilities
- Request vendor company/product updates
- Discover new vendors across numerous market sectors
- Identify competing products ahead of renewals

Monitor Vendors

- Provide foundational content for know-your-supplier requirements
- Emerging technologies
- Coming Soon:
 - Vendor news
 - Product updates
 - End-of-life notifications

Highlights

- Rich sector directories, including ESG, Indices, and Energy
- API integration of vendor/product descriptions into clients' internal platforms
- Client-driven prioritization of new vendors for upload and cataloging
- Vendors contribute company and product data through vendor portal
- More than 80 foundational company data fields
- Digital, flexible, dynamic and searchable database
