# Axon ACR

Axon compliance review offering complete transparency into your firm's licensing and reporting requirements.

Combining Axon's market data expertise, and supported by content from the PEAR platform, the Axon Compliance Review service (ACR) helps firms establish where they sit within the market data compliance spectrum, and makes recommendations for savings, efficiencies and process improvements and saves the results for future reference.

Integrated or stand-alone
The service can be provided either as a precursor to migrating to ADS, or as a standalone piece of work, to give firms peace of mind about their data licensing and reporting compliance status.

Bespoke service
ACR can be tailored specifically to the needs of each firm, depending on their market data compliance goals. Review your entire market data environment or just one application as required.

The way market data should be managed.
Our technology-enabled market data compliance platform is an industry game-changer.

Core features

In-depth understanding
The in-depth knowledge of the Axon analysts, coupled with the powerful knowledge database PEAR, provides a completed view of your market data environment from a compliance perspective.

Cost saving opportunities
Evaluates and recommends savings that can be made to market data spend, by employing netting and other potential cost saving strategies.

Exchange audit mitigation
Highlights any licensing inconsistencies, or exposures, and offers remediation advice to help achieve compliance across applications and services.

Leverage Axon tools
Populate licences and apps in PEAR and ACT as part of the process to get a functioning database to use in the future.
