# Axon ADP

ADP

A solution for exchanges and vendors to streamline the collection and management of market data usage declarations.

The Axon Declaration Portal (ADP) is a web portal that provides market data vendors and exchanges with the ability to collect and manage their customers' market data declarations. Delivering a simple, yet comprehensive online solution to market data reporting.

Automate
Automated market data declaration requests and reminders are sent out via email to all your subscribing clients. The status of each client declaration is monitored by the ADP administration portal.

Usage Count Graphic

Simplify
Market data declarations are entered into a web form via the Axon Declaration Portal. Spreadsheets sent back and forth by email are no longer required.

Declaration Status Graphic

Comply
Compliance for the client becomes easier with the simplified declaration process which can also be augmented with ACT, to enable a client to provide more details on how they are using the data.

Usage Count Trend

The way market data should be managed.
Our technology-enabled market data compliance platform is an industry game-changer.

Core features

Cloud based service
The ADP service is a resilient cloud-based service which is backed up to ensure data is retained for audit purposes, in line with exchange and vendor policy.

Easy access
ADP provides market data clients with a simple to use web enabled interface via secure login.

Role based logins
Multiple levels of access to the portal are available to allow you to manage which of your clients is allowed to read, save and submit their declarations.

Consolidated view
Through the administration portal the vendor or exchange can manage all their client's current and historic declarations, which also includes the ability to export the data for import to other systems, such as client billing.
