Energy & Commodities Market Data Scan

Review your desktop products & market data packages to optimize your energy & commodities data

- Are you sometimes wondering whether you have too many different and costly desktop products and (add-on) market data packages to fulfil the commodities & energy data needs for your end-user and applications base?
- Do you have the idea that your market data desktop products contain a lot more content and functionality than what would be sufficient for your end-users' markets/jobs?
- Are you concerned about the significantly year on year growing costs that all these desktop products and market data (feed) sets represent?
- Would you like to have your contracted desktop and market data (feed) packages reviewed by vendor-independent experts to obtain confirmation of your setup plus insight into possible mismatches, alternatives or savings?

Screen Consultants' **energy & commodities market data scan** helps you with all of this.

Review of your energy & commodities specialist market data (feed) packages

By investing a relatively small amount of money – that roughly equals the annual cost of one random end-user's specialist market data license – Screen Consultants can **review** your currently contracted market data desktop products plus your **energy & commodities specialist market data (feed) packages**.

With our findings we advise you of some potential **cost saving scenarios** and address some key elements that will support you when **renegotiations of contracts** are coming up. We can also validate whether or not your contracted services are in line and up to date with your end-users' & mid-/back office's needs & requirements for their jobs/tasks.

On top of that we can help defining the **best-fitting desktop product plus the required specialist data packages** for new end-users or functions in your organization.

Up-to-date and future-proof data packages

Over the years benchmarks and contract reference prices in the energy & commodities markets have changed and still change together with the developments in the respective markets.

We can assist to assure that both your existing and new-hired end-user base do have **up-to-date and future-proof data packages** available in line with their activities.

All that we need from you is your permission to view and use your inventory data and any additional information such as contracts, organizational charts and/or job titles & roles descriptions.

To be as precise as possible we would also prefer to interview some heads of desks to double-check our review and to avoid incomplete or incorrect interpretations. The deliverable will be a report with our findings and advice specified per product category/commodity team/desk/user.
